ANNEXURE –I

GUIDLINES FOR REMEDIAL TEACHING FOR SLOW LEARNERS FROM CLASSES 9 TO 12

Definition

A Slow Learner is a child of below average intelligence whose thinking skills and scholastic performance have developed significantly more slowly than the pace of his or her age.

“Slow Learners are the Learners whose learning pace is slower than their peers”.

- Slow Learners are neither rare nor unique
- One who cannot learn at an average rate from the instruction resources, texts, workbooks and learning materials designed for the majority of the students (less than the Average Rate)

Characteristics of Slow Learners:

1. The Learning Level of students is below average performance in School Based Assessment
2. Low educational attainment than what he/she is capable of.
3. Deficiency in basic skills (reading, writing, analytical ability).
4. Short span of attention and easily distracted by other things.
5. Weak/poor memory.
6. Poor self esteem (Low expectations of themselves) & lack of self confidence.
7. Takes more time to learn and can't keep pace with the rest of the class (in one or more subjects).
8. Difficulty in understanding /following several steps in a task
9. Prone to immature interpersonal relationships (Prefer Company of younger children)
10. May show immature language patterns.
11. Difficulty in connecting and transferring the information learnt in one situation to other.
12. They may not show consistent performance.
13. May not attend the class regularly
14. May show proficiency with particular task (Hands on activities, sports, co-curricular, etc.) other than subject areas.
15. May have poor reasoning skills.

## Identification of the Slow Learners

Early diagnosis of Slow Learner is necessary at the early stage. Teachers can identify Slow Learner through the following techniques.

1. Observation
2. Scholastic Tests
3. Case Study

### 1. Observation

Continuous Observation may be done by the teacher by watching the Child's behavior directly or indirectly. A child's behavior is not only observed in the class room but outside also. Observation may be done under simple as well as controllable conditions. The teacher should analyze and interpret the information he/she gets from his/her observation.

29/11

To screen the children for Slow Learners, teachers can use the above tool/checklist. Before using the check list on a child, teacher has to make sure that symptoms must be persistent for 5 to 6 months in functioning and it causes significant impairment. If a teacher finds "Yes" to more than 5 behaviours of a child, then the child may be considered as a Slow Learner. However, he/she cannot be tagged as a Slow Learner.

### 2. Scholastic Tests

These tests can throw light on areas like Arithmetic, Reading, Spelling, Composition, Writing, Language and Comprehension. General and specific problems of children are identified by the teacher through scholastic tests and causes of anomalies can also be evaluated properly. Assessment of Children's performance in specific subject is to be based on the cumulative record.

### 3. Case Study

Case Study is a process of studying and recording the history of a child, his/her family, early life and home environment over a period of time. It enables the teacher to study the learning difficulties, adjustment problems and behavioral problems of the child.

#### Role of a teacher to handle Slow Learners:

- Be patient with Slow Learners
- Show special attention and care
- Praise and raise them
- Allow the children to have own seating choice during peer teaching
- Encourage them to explore their interest areas
- Motivate them to ask questions
- Create an environment for the children to reduce distraction
- Select the concepts that are very short and simple
- Provide immediate positive feedback

  
29/11
